

Science on the Sound

Highline Community College's
Marine Science and Technology (MaST) Center Presents –

Marine Ecosystems and Human Health

Please join us to hear....

Usha Varanasi

*Science and Research Director
NOAA's Northwest Fisheries Science Center*

Saturday, February 21
12:00 – 12:45

**Highline Community College
MaST Center**

Located near the Redondo Beach Park

What are the emerging societal challenges we face with the degrading health of our environment? What are the scientific challenges in meeting these public concerns in light of our federal responsibilities at the Northwest Fisheries Science Center?

Dr. Usha Varanasi's talk focuses on degrading marine ecosystems and their impact on human health, using current Puget Sound issues as examples.
