Highline Community College's
Marine Science and Technology (MaST) Center Presents –

Why “Eat Less Meat” is the New Environmental Battle Cry: Saving Energy One Bite at a Time

Please join us to hear....

Erica Cline

*Assistant Professor,
IAS Environmental Science,
University of Washington*

Saturday, June 6
12:00 – 12:45

Highline Community College
MaST Center

Located near the Redondo Beach Park
<http://www.highline.edu/mast>

Many people are shocked to discover that they could save more energy by eliminating meat from their diet than by switching from a gas-guzzling SUV to a Prius. In fact, modern industrially-produced meat is remarkably wasteful of energy. When you add in the energy required for transportation, processing, and packaging, it becomes clear that our food choices are among the most significant environmental decisions we make. I'll discuss why, and how you can make a difference. — *Erica Cline*
