

Science  
on the  
Sound

Highline Community College's  
Marine Science and Technology (MaST) Center Presents –

## Discover the Hidden Streams of Highline: Miller and Walker Creeks

*Please join us to hear....*

### Dennis Clark

Public Outreach  
Stewardship Coordinator

**Saturday, November 15**  
**12:00 - 12:45**

**Highline Community College**  
**MaST Center**

Located near the Redondo Beach Park

Miller and Walker Creeks in Burien, SeaTac, and Normandy Park are constantly changing. Photos of fish, frogs, and forests will give you a new perspective on this part of Highline. Stream basin steward Dennis Clark from King County will take you on a photo tour showing what the creeks look like today and discuss how people are working to improve the health of the streams. Regardless of where you live, it is important to understand the ecological connections between the uplands and Puget Sound created by these and other creeks around the Sound.
