*Naturalist,  
Dolphin Avenues Presentations*

**October 4, Sat  
12:00 - 12:45**

**Highline Community College  
MaST Center**

Located near the Redondo Beach Park

Living in the Puget Sound area provides opportunities to watch a variety of wildlife. When we observe an animal, we may have questions on their habitat, communications and a desire to help make a difference in some way. The study of animal science and behavior is presented in a fun and interactive approach to learn about the Orcas in the Puget Sound area.
